

# Facial menu

## Express facial

When time is of the essence, this customisable facial will immediately revitalise your skin's radiance, leaving it with a healthy glow. Your skin will feel nourished and hydrated.

## Deluxe facial

A tailored treatment featuring a double cleanse, steam, exfoliation, massage, light peel and mask. This is our ultimate relaxing treatment for you to unwind whilst you get pampered and we will customise this facial to suit what your skin needs. This treatment is designed to rejuvenate, replenish and restore, offering an amazing moisture boost. Relax...as your tension and stress fade away.

## Deep cleanse facial

For skin that requires intensive exfoliation and detoxification.

Includes a double cleanse, exfoliation, tone, steam, extractions and bespoke mask. To draw out oil and impurities deeper within the skin, this treatment banishes blackheads, unclogs pores and refines, purifies and hydrates the skin. This is perfect for anybody suffering from acne, oiliness or congestion and just wanting a deep clean!

## Lymphatic Therapy Facial

Lymphatic therapy has been designed to work with our circulatory system, an overlooked but vital component of our skin's health. This system is responsible for removing waste out of our system via our blood supply. When blood is circulated around the body it provides nutrients such as amino acids, water and oxygen to the cells. Occasionally, there are roadblocks in these pathways that make it difficult for all of the nutrients to reach their destination and be absorbed, giving rise to certain skin concerns and conditions. This is why lymphatic drainage is so important to flush out toxins and clear a pathway for all the essential nutrients, bringing oxygen and nutrient-rich blood to the surface. Along with the above, extra delicious ingredients have been added for extra boost, including antioxidants, vitamins and Australian native extracts.

## EpiGenetic Facial – meso[epigen] system™

A true skin journey – the latest professional anti-ageing facial system inspired by the most advanced medical cosmetic ingredients. This 100% customised protocol is delivered by a unique diagnostic system and uses integral anti-ageing solutions to combat ageing from its origin.

Four unique treatment plans include:

1. Brightening Booster – brightens, revitalises and deeply moisturises the skin.
2. Firming Booster – creates a lifting effect and reduces laxity within the skin, stimulating collagen and elastin production.
3. Anti-Wrinkle Booster – a combination of peptides that smooths the skin's surface, reducing wrinkles and expression lines, and prevents free radical damage.
4. Redensifying Booster – restructures and activates the main elements within the skin using stem cells and hyaluronic acid, plumping up, rejuvenating and hydrating the skin.

The EpiGenetic Facial is a perfect combination of relaxation and intensive anti-ageing technology to deliver exactly what your skin needs.
