## Microdermabrasion menu

## **Express Microdermabrasion**

Microdermabrasion uses a diamond encrusted tip and suction to slough off dead and dry skin cells and can be described almost as a buff and polish for the skin. This helps to remove debris from within the skin, as well as increasing blood circulation, unclogging blocked pores and improving congestion. This leaves skin feeling clean, refreshed and smooth.

A mask is applied after the microdermabrasion while the skin is a blank canvas, ready to absorb all active ingredients put onto it. This maximises the effects of any products applied, whether that be hydration, brightening soothing, anti-ageing or detoxifying.

#### **Enhanced Pro Microdermabrasion**

The Enhanced Pro Microdermabrasion is the ultimate treatment to target a variety of skin concerns and is a leap up from the Express Microdermabrasion Purifying steam and the pre-peel will work to soften the glue that holds down the dead skin cells, allowing the microdermabrasion to pick up as much as possible. Our microdermabrasion uses a diamond encrusted tip and suction to slough off dead skin cells. Extractions are included to deeply decongest the skin and remove impurities – this also alleviates pressure within the skin and reduces bumps to allow for a faster recovery. We have a huge range of peels to choose from to suit your specific skin concerns. This and a bespoke mask are applied after the physical microdermabrasion process. Achieve your skin goals now for a glowing, clearer, plump, more youthful appearance.
